

I wanted to send a comment showing support for the proposed dam on the Blanco River between San Marcos and Kyle. I own property at the confluence of the San Marcos and Blanco Rivers. We are in support of anything that can help with the flood stage on the Blanco River. We have owned this property since the 30's and our family has endured many major floods that cause major damage. This would be a great help to many property owners and the cities that are all effected by major floods on the Blanco. One of these major cities would be San Marcos. In major flood stage we have seen flood waters travel back up the San Marcos River and helps to cause a bad situation to be worse. We hope that this idea will become reality in the near future.
