Notes																		
1) Edwards Aquifer Authority and Barton Springs / Edwards Aquifer Conservation District are not included in this table.																		
2) Edwards Balcones Fault Zone Aquifer and various minor aquifers are not included in this table.																		
3) Management Plan status as of December 31, 2003.																		
4) Production limits obtained from available GCD rules.																		
5) Recharge estimates extracted from steady-state data files for Groundwater Availability Models (GAMs) and do not include increased recharge or inter-formational flux with pumpage stress. CGC = DRAFT Central Gulf Coast; SCW = Southern Carrizo-Wilcox; CCW = Central Carrizo-Wilcox; THC = Trinity Hill Country																		
6) Shading indicates that local demand exceeds estimated supply from the aquifer.																		
7) Demand excludes groundwater exports in the 2001 South Central Texas Regional Water Plan.																		
8) Planned export averaging a combined 14,200 acft/yr from Refugio, Goliad, and/or Victoria Counties as part of the Lower Guadalupe Water Supply Project.																		
9) Management Plan Recharge and 2010 Supply value quoted is for all aquifers except the Edwards.
