Potential Issues For The 2016 SCTRWP

August 7, 2014

- 1) Carrizo Aquifer Workgroup (Status: Recommendation Approved)
 - a) Multiple Potentially Feasible Projects Exceed MAG
 - b) TWDB will not allow for over-allocation in the 2016 RWP
- 2) Importing Groundwater from Other Regions (Status: Technical Consultants have initiated discussions regarding Hays County-Forestar Project)
- 3) Meeting Needs of Formosa (Status: Con Mims has discussed with LNRA)a) Coordination with Regions P and N
- 4) Implementation of TCEQ Estuary Environmental Flow Standards (Status: No documentation from TCEQ; Proceed based on comments with TCEQ)
- 5) Population and/or Water Demand Projections Revisions (Status: Finished)
- 6) Eagle-Ford Shale Demands Direct, Indirect, and Induced (Status: Finished)
- 7) Whooping Crane Litigation (Status: District Court Decision Reversed by Fifth Circuit Court of Appeals – 6/30/14)
- 8) Meeting Steam-Electric Needs in Victoria County (Status: GBRA to meet the Need; WMS for your consideration)
- 9) Inter-Regional Coordination (e.g. SAWS Competitive Sealed Proposals) (Status: To Be Evaluated for Regional Water Plan)
- 10) Legislation (Status: Legislative Session Ended; Responding to legislation adopted in 2013; New Session begins January 2015)

TASK 4D WATER MANAGEMENT STRATEGIES Scope and Budget #6

Perform Technical Evaluations including Cost Estimates

Perform technical evaluations, including cost estimates and documentation, of the following water management strategies (WMS) to be consistent with current projections of water supply needs and facilities planning pursuant to TWDB rules and guidance. Work effort involves coordination with sponsoring water user group(s), wholesale water provider(s), and/or other resource agencies regarding projected needs, planned facilities, costs of water supply, endangered or threatened species, etc. Work effort includes cost estimates and supporting documentation to reflect the September 2013 cost basis for the 2016 regional water plans pursuant to TWDB guidance.

SAWS Seawater Desalination

Update technical evaluations for the Seawater Desalination water management strategy to be consistent with current projections of water supply needs and facilities planning pursuant to TWDB rules and guidance. Coordinate with the San Antonio Water System (SAWS) in order to be consistent with their Water Supply Plan regarding this WMS with technical focus on available information regarding water treatment technology and plant location, off-shore brine disposal, pipeline route, and transmission capacity. Estimate cost of project and document in the technical evaluation.

Victoria County Steam-Electric

Update technical evaluations for the Victoria County Steam-Electric water management strategy (formerly the GBRA-Exelon Project) to be consistent with current projections of water supply needs and facilities planning pursuant to TWDB rules and guidance. Work effort involves coordination with GBRA and others regarding changed conditions in terms of projected needs, planned facilities, costs of water supply, endangered or threatened species, etc. Update cost estimate of project focusing on available information from the 2011 Region L Water Plan and document in the technical evaluation.
